 - The first 2 digits of the Federal Supply Class are the Federal Supply Group. For example, if the first 4 digits were 1830, the “18” would signify the Federal Supply Group titled Space Vehicles, and “1830” as a whole would signify Space Vehicle Remote Control Systems. If the number were “1820,” then it would be Space Vehicle Components.

 - A 13-digit code. NSNs are used to identify and manage every product imaginable. Each item is assigned a unique series of numbers giving information about the name, price, physical/performance characteristics, manufacturer, and dimensions.
